Education and Certifications

RAF – School of Computing, University UNION.

- Bachelor of Computer Science
- Master of Computer Science

Oct 2019 – Sep 2023
Oct 2023 – Dec 2024

Experience

NCR – DevOps engineer and Scripting lead

May 2025 – Present

PowerShell | Microsoft Azure | GCP | Kubernetes | GitHub Action | MySQL

- Orchestrated **end-to-end automated deployment pipelines** for Azure VM environments using GitHub Actions and PowerShell, **slashing deployment time to 1 hour** from several hours of manual work.
- Engineered a **continuous 24/7 monitoring** and alerting architecture using Grafana and Prometheus, **eliminating manual VM checks** by centralizing server health on a single dashboard.
- Automated the complete **IIS certificate renewal process**—including dynamic CA validation and SQL script execution, removing manual intervention and **preventing certificate downtime**.
- Spearheaded multiple infrastructure automation initiatives as Scripting Lead, including scheduled Azure VM health checks and automated account recovery scripts, to **drastically reduce operational overhead**.

Banca Intesa Beograd – Full-Stack and Dev Ops engineer

Mar 2024 – May 2025

C# .NET | Angular | MySQL | Microsoft Azure Pipelines | PowerShell

- Developed a workhour tracking web application to automate scheduling and on-call monitoring, **eliminating 8 hours of weekly meetings**.
- Co-designed a centralized controller pipeline that **fully automates all deployment requests**.
- Upgraded automated Azure pipelines to handle complex deployments (SQLs, RDLs), **removing manual interventions** and improving API reliability.
- Implemented a modern UI-based reporting system to replace legacy email notifications, **enhancing overall system monitoring** and responsiveness.

Projects And Competitions

Helping Hand AI Overlay App | Python, PyQt, FastAPI, Firebase, REST/HTTPS

Engineered a **cross-platform desktop overlay assistant** using Python and PyQt, enabling seamless chatbot interactions and workflow assistance without context switching.

Made a **secure backend architecture** with a FastAPI server **deployed on a VPS**, implementing encrypted HTTPS communication, user key management, and a **Firebase-hosted frontend storefront**.

AI Video Generation Platform | React/Next.js, Java/Spring, PostgreSQL, Firebase, LemonSqueezy

Collaborated with a small team to build a web application for composing AI-generated videos with custom dialogue, characters, and audio. Integrated LemonSqueezy for secure store purchasing and payment processing, alongside Firebase for robust user authentication.

Competitions:

- **1st Place – 5 Days In The Cloud:** Built a cloud-native solution utilizing Java and the **AWS stack**.
- **2nd Place – Nordeus Full-Stack Challenge:** Developed an interactive, full-stack game utilizing Java and Angular.
- **2nd Place – LauzHack 2024:** Engineered a custom Raspberry Pi-based hardware monitoring system.
- **EDTH 2025 Project:** Designed and implemented an automated Raspberry Pi and Arduino **node mesh network**.

Skills

- **Programming Languages:** Java, C#, Python, PowerShell, JavaScript, TypeScript, SQL, HTML, CSS, Kotlin
- **Frameworks & Tools:** Angular, React, Spring, Docker, Kubernetes, Git, Azure, GCP, SQL, Firebase, RabbitMQ, Prometheus
- **Spoken Languages:** English (Native / C1 Advanced), Serbian (Native)
